From the INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

To: Och Style THOMPSON, Clive, Beresford \$32.7° 5 4 **GLAXOSMITHKLINE** Appellace we were NOTIFICATION OF TRANSMITTAL OF Corporate Intell. Property THE INTERNATIONAL PRELIMINARY (CN925.1) **EXAMINATION REPORT** 980 Great West Road Brentford, Middlesex TW8 9GS (PCT Rule 71.1) GRANDE BRETAGNE Date of mailing Fil 17 Ct 30.04.2004 (day/month/year)-Applicant's or agent's file reference IMPORTANT NOTIFICATION AXP/PG4784 International application No. International filing date (day/month/year) Priority date (day/month/year) PCT/EP 03/03335 27.03.2003 28.03.2002 Applicant

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

GLAXO GROUP LIMITED et al.

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Description, Pages				
	1-103		as originally filed		
	Cla	ims, Numbers			
		· ·			
	1-2	7	as originally filed		
2.	. With regard to the language , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.				
These elements were available or furnished to this Authority in the following language: , which is:					
☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1					
☐ the language of publication of the international application (under Rule 48.3(b)).			ication of the international application (under Rule 48.3(b)).		
		the language of a tra Rule 55.2 and/or 55.3	inslation furnished for the purposes of international preliminary examination (under 3).		
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:				
		contained in the inter	rnational application in written form.		
		filed together with the	e international application in computer readable form.		
	☐ furnished subsequently to this Authority in written form.				
		☐ furnished subsequently to this Authority in computer readable form.			
	The statement that the subsequently furnished written sequence listing does not go beyond the disclosin the international application as filed has been furnished.				
		The statement that the listing has been furni	ne information recorded in computer readable form is identical to the written sequence ished.		
4.	The	amendments have re	esulted in the cancellation of:		
		the description,	pages:		
		the claims,	Nos.:		
		the drawings,	sheets:		
5.		This report has been been considered to g	established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)).		
		(Any replacement sh	neet containing such amendments must be referred to under item 1 and annexed to this		
6.	Add	litional observations, i	f necessary:

111.	II. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability						
1.	The obv	ne questions whether the claimed invention appears to be novel, to involve an inventive step (to be non- ovious), or to be industrially applicable have not been examined in respect of:					
		the entire international application,					
	☒	claims Nos. 24,26,27					
		because:					
	Ø	the said international application, or the said claims Nos. 24 relate to the following subject matter which does not require an international preliminary examination (specify):					
		see separate sheet					
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):					
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.					
	⊠	no international search report has been established for the said claims Nos. 26,27					
2.	or a	meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/ amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative structions:					
		the written form has not been furnished or does not comply with the Standard.					
		the computer readable form has not been furnished or does not comply with the Standard.					
V.	Rea	easoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; itations and explanations supporting such statement					
1.	Stat	atement

see separate sheet

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claim 24 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- PATENT ABSTRACTS OF JAPAN vol. 016, no. 544 (C-1004), 13 November 1992 1) (1992-11-13) & JP 04 208267 A (MITSUI PETROCHEM IND LTD;OTHERS: 01), 29 July 1992 (1992-07-29) [D1] which concerns a different problem discloses a compounds /RN-Caplus-Nr. 145820-60-6 (cf. also paragraph "new material" of abstract) which is novelty destroying for the present claims 1, 2 and 4-12.
 - Therefore the subject-matter of present claims 1, 2 and 4-12 is not novel with respect to Article 33(2) PCT.
- US-A-5,919776 [D2] which also concerns modulators of chemokine recceptors 2) discloses aminoquinoline derivatives where the substituents at the amino residue may form a morpholine ring. However, the structural combination of a heterocyclic structure and a morpholino residue seperated by an urea group is not discloses in D2.
 - Since it was not predictable that compounds with such a structure which is quite different from the known one would in fact exhibit CCR3-binding properties as could be proved by the applicant (cf. present pages 34-37) the novel, searched subject-matter also involves an inventive step pursuant to Article 33(3) PCT.
- For the assessment of the present claim 24 on the question whether it is 3)

INTERNATIONAL PRELIMINARY

International application No. PCT/EP03/03335

EXAMINATION REPORT - SEPARATE SHEET

industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

- 4) WO-A-02 26723, which is an intermediate document and no document under Article 33(2) PCT, discloses compounds as such and a use thereof which are nearly all disclaimed from claim 1. However, the RN's as indicated in the search report are still novelty destroying for the indicated claims.
- 5) D2 which is a relevant prior art has to be cited in the description in accordance to Rule 5(1)(a)(ii) PCT.
